

# Insider Threat Program Baseline

Data Sheet

## Does your organization have a solid foundation to protect against insider threats?

### Advance beyond industry best practices

Our Insider Threat Program Baseline **appraises the effectiveness of fundamental components** needed to protect against insider threats. Whether you have a *formal* insider threat program or not, our experienced team works to **assess your program** against industry best practices and your organization's threat profile.

### To mitigate risk of discovered gaps and vulnerabilities, we provide actionable recommendations that include:

- **Insider threat maturity** rating provides insights into overall exposure and controls pertaining to insider threats.
- **Baseline analysis of personnel, processes, and technologies** drives optimization of existing resources and articulates the benefits of emerging capabilities and technologies.
- **Comprehensive strategic roadmap** provides phased objectives and detailed guidance to mature your insider threat program.

*"Your team exceeded our expectations on the quality and detail of the deliverables."*

**Vice President,**  
Corporate Security Electric Utility

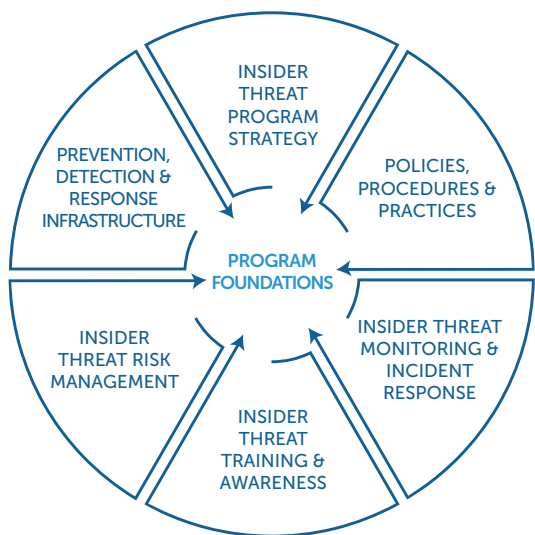

### Service Benefits

- Benchmark the current-state maturity of your program or program elements
- Identify foundational elements your organization can build on
- Maximize capabilities of existing tools for quick wins
- Promote mitigation strategies—both short- and long-term
- Align roadmap with security program mission and constraints

## Approach & Methodology

### Six Program Foundations

Our approach enables your organization to establish or enhance a proactive program capable of detecting and defending against insider attacks. We evaluate and rate against six program foundations.

### Assessment Objectives:

1. Identify foundational elements to build on
2. Evaluate the maturity and effectiveness of current program's key components
3. Identify security gaps
4. Conduct a detailed assessment of tools such as SIEM, UEBA, and other cyber, physical, and personnel security technologies
5. Evaluate performance of monitoring tools used to alert, detect, and investigate insider threats
6. Identify risks, gaps, and vulnerabilities within current program
7. Generate comprehensive strategic roadmap with phased objectives and detailed guidance to mature client's insider threat program
8. Compile documented or demonstrated evidence with calibration of outcomes including input and review by subject matter experts

## Partner with Revolutionary Security

As a cybersecurity-focused firm, Revolutionary Security is dedicated to helping enterprises outpace cyber threats using proactive defense capabilities. Built on expertise gained defending the world's largest defense contractor and Fortune 500 critical infrastructure networks from cyber-attacks, our company brings unique cybersecurity experience and unrivaled passion for cyber defense to every engagement.

## Outpace Cyber Threats from the Inside Out
