

Incident Response Services

Enhance Incident Response capabilities and respond with confidence when compromised

The Challenge

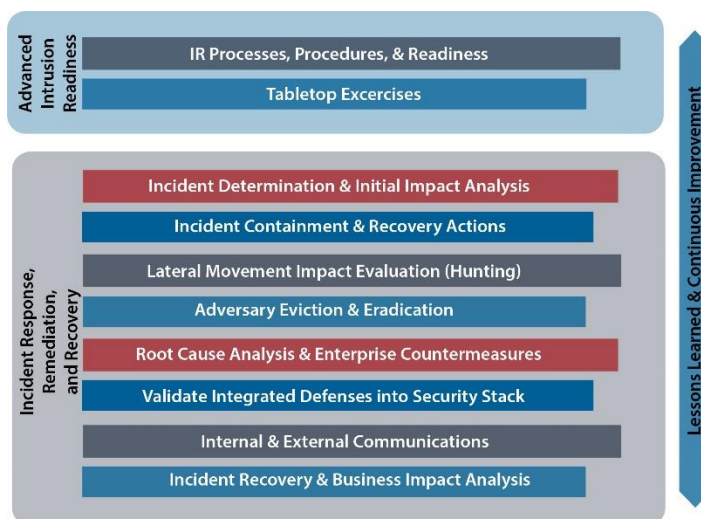

- ✓ Organizations are not prepared to respond and recover from a large scale or targeted attack
- ✓ Evaluating IR response processes, testing their effectiveness, and promoting continuous improvement
- ✓ Implementing strategic mitigations resulting from incidents to minimize risk exposure

Why Revolutionary Security

- ✓ **Our People** – Incident Response analysts have a broad range of experience, including years of hands-on incident response investigations dealing with advanced and targeted espionage and cybercrime attacks.
- ✓ **Our Services** – Engagement models designed to provide proactive Incident Response readiness services coupled with active Incident Response and recovery services.
- ✓ **Our Experience** – A proven track record of providing Incident Response services across multiple industries including Oil & Gas, Utilities, Financial Services, Health & Life Sciences, Chemical, Technology & Communications, Manufacturing, Transportation, Law, and other industries.

Engagement Model

Incident Response (IR) services provide both pre- and post-intrusion and incident response actions to recover and improve defensive resiliency resulting from cyber attacks. Leveraging our proven IR methodology ensures a holistic lifecycle from impact analysis and recovery to enterprise countermeasures and continuous improvement.

Benefits

- ✓ *Experienced professionals with years of hands-on advanced cyber incident analysis, response, restoration, and remediation.*
- ✓ *Crisis mitigation team available to provide immediate response and recovery actions across multiple industries and environments.*
- ✓ *Scalable and customizable service offerings to meet desired incident planning, simulation, and response objectives.*
- ✓ *Emphasis on holistic recovery and proactive prevention of future attacks by completing root cause analysis and assessment of enterprise-wide security gaps.*

Incident Response Services

Service	Description	Value
Incident Response Transformation Services	Proactive services to enhance current Incident Response capabilities across people, process, and technology. A core team of Revolutionary Security IR enhancement consultants will provide knowledge transfer, identify key areas of improvement, and support process enhancement, adoption, and training.	Improve Incident Response capabilities and evaluate the ability to defend against an advanced cyber adversary. Expert best practices and training to support IR leadership and senior analysts, identify enhancement opportunities, and achieve desired capability maturity.
Incident Response Testing and Evaluation Services	Tabletop scenario exercises enable the evaluation of Incident Response readiness to respond and recover from an advanced cyber incident. Revolutionary Security consultants provide a comprehensive training and testing program to evaluate your readiness and resiliency during an enterprise-wide cyber incident scenario.	Testing Incident Response capabilities across the organization identifies process enhancements and supports continuous improvement. Advanced cyber incident scenarios evaluate current defensive capability and the organization's ability to collectively respond and recover.
Active Incident Response and Recovery Services	During active cyber incidents, Revolutionary Security provides immediate Incident Response support and recovery efforts. A core team of IR "Parachute Team" consultants support active incident response activities and drive identification of defensive improvement opportunities.	Recover from an active cyber incident and improve defensive resiliency across the organization. Understand the scope and impact with assurances that the adversary has been evicted and eradicated with strategic countermeasures designed to prevent current and future attacks.

What to Expect

- ✓ Experienced Incident Response Analysts
- ✓ IR Process Enhancement and Response Services
- ✓ Experience with Advanced Threat Actors and Campaigns
- ✓ Tactical and Strategic Mitigations Support
- ✓ Comprehensive IR Process with Root Cause Analysis
- ✓ Alignment to Industry Best Practice Response Frameworks

About Revolutionary Security

Revolutionary Security is an experienced and talented team of cyber security professionals whose mission is to provide our clients with the knowledge and expertise to defend their enterprises against cyber threats. Our cyber security consulting and advisory services focus on helping our clients evolve their capabilities across the entire spectrum of people, process, and technology. Revolutionary Security was established by a team whose expertise comes from Defense and Intelligence Community experience and over a decade of tailoring solutions to protect Fortune 500 / Global 1000 companies from all cyber threats.
